

Task 2

Classification Algorithms

- Predict the 'outcome' by using the following algorithms:
 1. Decision Tree Regressor
 2. Decision Tree Classifier
 3. Random Forest Regressor
 4. Random Forest Classifier
- Dataset: Download the dataset from [here](#).
- Submission form: [click here](#)
- Points to remember:
 - Explore with the parameters to achieve your highest accuracy (use `classification_report`, `accuracy_score`, etc.)
 - Document the whole process of your flow of work.
 - Upload the link to your Google Colab notebook or GitHub file in the submission form.
